

Annual Compliance Testing is a requirement for ACR accreditation and some regulatory agencies. A standard set of tests and procedures that could satisfy compliance testing will be discussed. A model program for satisfying the requirement of a state regulatory agency will be presented. The American College of Radiology Performance Standards will also be presented and discussed in light of the of the recently initiated ACR MRI accreditation Program.

**Educational Objectives:**

Upon completion of this course, participants will be prepared to:

1. Design compliance testing programs for Magnetic Resonance Imaging.
2. Develop the appropriate records and reports associated with these programs.
3. Understand the origins and interpret phase stability and uniformity tests
4. Implement a CT program satisfying ACR accreditation requirements.
