

AbstractID: 7833 Title: AAPM New Member Symposium

The New Members Symposium will provide an introduction to the AAPM, our current officers, council chairs and operations. This will be followed by a brief review of how to apply for a job by past president Howard Amols. AAPM leaders will remain at the symposium to continue informal discussions following the brief opening presentations.

The New Members Symposium is followed directly by the Meet the Experts sessions in the same room. Bill Hendee, Gary Barnes, Dan Low and Jim Hevezi, all individuals with many years of experience will address current issues and lead discussions on many medical physics aspects of Imaging Research, Imaging Clinical, Therapy Research and Therapy clinical.

Objectives:

To introduce new members to the AAPM leadership and operations

To provide discussions with experts in medical physics
