

**Integrating the Healthcare Environment – Radiation Oncology
Call for Nominations
Planning Committee – Physics Co-Chair**

Due to changes in various work and volunteer responsibilities, Alf Siochi will be stepping down as Physics Co-Chair of the Planning Committee (PC). We would like to thank him for all he has contributed to IHE-RO over the years.

At this time, we would like to call for nominations for a new PC Physics Co-Chair. This position shares leadership of the PC with Physician and Vendor Co-Chairs. The position is for 2 years and is renewable.

As Physics co-chair, you would lead efforts in guiding the planning committee on the clinical physics aspects of interoperability of radiation oncology equipment, such as the clinical workflow, the data required by various equipment in the workflow, and the limitations of current equipment.

The responsibilities of the planning committee are:

- Develop IHE-RO's presence promoting safety within Radiation Oncology
- Solicit Use Cases from Radiation Oncology Stakeholders
- Provide prioritization of new/early active Use Cases for the Technical Committee (TC)
- Provide clinical input on active use cases as requested by TC

The goals of the committee are:

- Solicit input from outside to identify interoperability needs
- Develop work item proposals to address identified interoperability needs
- Prioritize and select work items based on global analysis of the needs of the Domain, Domain scope, fit with existing IHE Profiles and feasibility evaluation from the Technical Committee.

Please forward your nominations, including self-nominations, to Jill Moton at jill@aapm.org by Monday, November 28, 2022.
