

Many medical physicists invest significant time and effort into preparing PowerPoint presentations for a variety of audiences and purposes. Providing a voluntary, central system for medical physicists to contribute PowerPoint presentations and making them available to other AAPM members would be a great service to the medical physics community and the many audiences to whom we speak. These submitted presentations will be part of the Virtual Library for use as needed at no charge to AAPM members. Use and presentation by members will be the sole responsibility of the presenter with no liability to the submitting author. Users must agree to credit the AAPM Slide Exchange program, program authors, and any other citable sources. Slide programs will be organized by subject.
