

2004 Education Council Symposium

“Educational Products for the Medical Physicist”

Introduction

H. Mower, Lahey Clinic Medical Center, Burlington, MA

The AAPM has available to its members various resources to assist in the teaching and training of various professionals in related disciplines. We also have available materials that describe who we are and what we do. Are you aware of these? Also several of our members have instructional or educational slide sets that they would like to make available to our membership. To this end we will look at some of the resources being offered and discuss how to best make them available to our membership. This symposium will introduce the participant to some of the many resources available through our Association. It will meet the following objectives noted below.

Educational Objectives:

1. The participant will be introduced to the resources available through the “Medical Physics Education of Physicians” Committee. Show excerpts from:
 - a. Radiobiology Slide Set
 - b. Radiation Effects and Protection Slide Set
 - c. Educational Resource Slide Set

Highlight upcoming resources

2. The participant will be introduced to the resources available through the “Public Education” committee. Show excerpts from or have available:
 - a. Diagnostic Medical Physicist Brochure
 - b. Radiation Oncology Physicist Brochure
 - c. Nuclear Medicine Physicist Brochure
 - d. Slide Set for High School Students
 - e. Slide Set for undergraduates

Highlight upcoming resources

3. The participant will be introduced to ‘personal’ slide sets that the AAPM is considering providing a means to access.
