

AbstractID: 2301 Title: Current Status and Future of CAD: Manufacturers' Perspectives

The use of computerized image analysis to assist radiologists in the interpretation of medical images has become a very active field of research -- both at the academic and industrial levels. This symposium will involve representatives from industrial CAD groups who will comment on their perspectives relative to the current status and upcoming advances in CAD. To date, representatives from Deus, GE, Kodak, Philips, R2 Technology, and Siemens have committed to participating in this symposium. Each representative will initially be allowed time for presenting their companies' status and vision. A panel discussion will follow that will include the industrial representatives as well as audience participants.

Conflict of Interest Statement

M. L. Giger is a shareholder in R2 Technology, Inc. (Sunnyvale, CA).
