FOR IMMEDIATE RELEASE

Varian Medical Systems to Offer CIVCO Medical Solutions’ Body Pro-Lok™ for SBRT

Kalona, Iowa, USA, – CIVCO is pleased to announce the signing of a reseller agreement that would allow Varian Medical Systems to offer CIVCO’s Body Pro-Lok to its customers. Introduced in 2008 and installed at over 150 community and academic facilities worldwide, Body Pro-Lok excels as a modular base for indexable patient positioning, secure immobilization and efficient patient transport.

Body Pro-Lok was designed to maximize patient comfort during immobilization for treatment. Niko Papanikolaou, Ph.D, Chief of the Division Medical Physics at UT San Antonio’s Cancer Therapy & Research Center, has worked extensively with the Body Pro-Lok immobilization product. “The Body Pro-Lok system is very effective for SBRT respiration immobilization,” said Papanikolaou. “It is highly indexed, provides setup reproducibility and it is an easy and efficient device to use for robust immobilization.”

When used with CIVCO’s Protura Robotic Patient Positioning System and Universal Couchtop, Body Pro-Lok is part of a complete motion management solution. Protura and Universal Couchtop have been validated with Varian’s Clinac® and Trilogy® platforms. Body Pro-Lok is available worldwide through CIVCO’s account representatives, and now also through Varian’s sales channels.
About CIVCO

CIVCO Medical Solutions has over 30 years of experience and offers cutting-edge medical technology to a diverse group of medical professionals. The Multi-Modality Imaging (MMI) unit designs and manufactures accessories for use in diagnostic and therapeutic imaging and interventional procedures, with a strong focus on ultrasound. MMI’s products range from infection control products including a wide range of ultrasound and CT covers to device guidance, positioning and electromagnetic needle tracking. CIVCO’s Radiation Oncology division designs and manufactures products for radiation oncology treatment, including basic patient positioning equipment as well as high technology robotic motion management and advanced patient positioning for SBRT. CIVCO offers patients and clinicians the newest and best technology available to improve patient care.
