

AbstractID: 14622 Title: Introduction of RSO Training Lectures

The role of Radiation Safety Officer is quite varied depending on the type of license and the areas of use. This session is designed to familiarize physicists with the range of responsibilities that may befall an RSO and to provide them with an understanding of the fundamental issues associated with different areas of use.

**Educational Objectives:**

1. Understand the regulatory issues associated with becoming an RSO.
2. Understand the issues associated with Nuclear Medicine .
3. Understand the issues associated with Radiation Oncology.
4. Understand other associated issues with TJC, CMS and the State.
