

Updated Demand and Supply Models

Michael D. Mills, PhD

How many patients annually per Qualified Medical Physicist

- Abt I 1995 421
- Abt II 2003 325
- Abt III 2008 304

- ### Conclusion: How many physicists must we train?
- Current number of CAMPEP Residents must increase from 40 to a minimum of 125 per year by 2020; 100 will not work!
 - A more comfortable number would be 150; 200 would balance supply and demand
 - If we are unable to make enough TRPs:
 - Will more medical physicists retire or leave the profession?
 - Will this impact safety and quality assurance?
 - Will this impact patient care negatively?
