RADIATION ONCOLOGY MODEL

The Radiation Oncology (RO) Model proposed rule has been posted to the Office of Management and Budget (OMB) website.

While we do not have any inside information on what the proposal entails, ASTRO suspects it is a cancelation of the RO Model. Given CMS’ recent decision to let Oncology Care Model expire and the lack of interest in fixing the RO Model, the Agency may be taking a step back on bundled payment for cancer care.

AAPM will provide additional detail once the RO Model proposed rule is posted to the Federal Register.
